## WE ARE READY FOR SUMMER!

The month of May has kept everyone very busy with so many events and activities! We began the month with our preschool students taking the annual end of school year field trip to the Gorman Nature Center. This field trip is always so fun for the preschoolers. They spend the morning holding and learning about different animals, taking a nature walk and eating a picnic lunch in the pavilion.

Next, we had a muffins to go breakfast for all of the mothers in our building on Friday, May 12th. We appreciate all of our moms, grandmas, aunts and mother figures in our lives.

The preschool classes had their annual field day to celebrate the end of the preschool year. The Career Tech Child Development students, their instructor

Mrs. Brandt and the preschool teachers planned many fun activities for the them. The preschool classes spent their day playing with the parachute, face painting, outdoor games, balloon dance party in the gym, and ice cream sundaes. Thank you to the Child Development students, Mrs. Brandt, and the preschool school teachers for making this day so special for the preschool students!

The Child Development students also planned a fun field day for our toddlers. They spent their time coloring with chalk, creating a big picture together, sensory activities and making balloon animals. The 22-23 MECLC graduation completed our month of events.

We had 60 preschool students participate in the graduation to celebrate the end of the preschool year. There will be 38 preschool students that will be moving on to kindergarten in the fall. Some of them have been with us since they were an infant. We wish all of them good luck as they leave our program. We will miss them and their families so much!

Oh the places you will go.

Today is your day!

Your mountain is waiting.

So get on your way!

- Dr. Seuss
